Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

https://www.youtube.com/watch?v=OpSTlDJWFFI

2026-05-25
Leaked ufo/uap/ebe footage. Confidential. Classified documents.1942-1969.

Relevant information:

0135 location and status unclear as of 2026/04/21. Incapacitation presumed.

Per provision with network, continuity releases are triggered.

7 video tapes with material recorded between 1942-1969.

Material containing UFO incidents, recovery and study of extraterrestrial life forms. Full disclosure pending.

Source anonymity is maintained.
Failsafe contract is preserved.

The video contains sample edited fragments of tapes 02, 05, 06.

Tape duration: 180 min
Total recorded duration: 1.260 min

Tape 02:

Case 11/Tin bird unauth	00:33:30 - 00:33:34
Case 12/Mk.4 taxi	01:08:21 - 01:08:22
Case 12/Mk.4 pace lap	01:10:55 - 01:11:21

Tape 05:

Case 26/Tim's show &tell	01:01:18 - 01:01:19

Tape 06:

Case 31/Mk.5 virgin (col/s)	00:57:56 - 00:58:04

qtecqot01_1096.png

Video main information:

Size: 1920x1080 px

Russian message - qtecqot01_0983.png

A message written in Russian appears from frames 970 to 989, following the introductory message.

AI 1/2 - Google Gemini 3.1pro/3.6 analysis

Transcription (Russian):
Предыдущее сообщение
предупреждало об AAP

Translation:
Previous message
warned about AAR

Looking closely at the right edge submerged in shadow, you can indeed make out the beginning of a rounded letter right after "AAP".

Here are the most plausible hypotheses:

- **The letter C (Cyrillic "S") — *The most likely option***
  Visual: You can see the top of a rounded curve opening to the right.
  Context: In military / aviation terminology (frequent in simulations or technical contexts), the acronym **AAPC** (AARS) is very common (for instance, standing for *Авиационный Артиллерийский Реактивный Снаряд* or a similar system equivalent).

- **The letter O (Cyrillic "O")**
  Visual: The beginning of a closed circle.

- **The letters Э, E, or 3**
  Visual: These letters also feature a rounded stroke on their left side.

Impact on the text

If the letter is indeed a **C**, the complete sentence would be:

Russian message - qtecqot01_0983.png

A message written in Russian appears from frames 970 to 989, following the introductory message.

AI 2/2 - Google Gemini 3.1pro/3.6 analysis

Translation and explanation of **ААРС «Авиационный Артиллерийский Реактивный Снаряд»**:

Translation

English Translation: Air-launched artillery rocket projectile *(or Aviation artillery rocket projectile)*

Word-by-Word Breakdown

- **Авиационный** (*Aviatsionnyy*) = Aviation / Air-launched / Aircraft-mounted
- **Артиллерийский** (*Artilleriyskiy*) = Artillery / Ordnance-related
- **Реактивный** (*Reaktivnyy*) = Rocket-propelled / Jet-propelled
- **Снаряд** (*Snaryad*) = Projectile / Shell

Detailed Explanation

In Russian military terminology, **Авиационный Артиллерийский Реактивный Снаряд (ААРС)** refers to a type of **rocket-propelled weapon or unguided rocket fired from combat aircraft or helicopters**.

Here is how the terms connect in military context:

1. **Artillery + Rocket (*Артиллерийский реактивный*):** In Soviet and Russian military classification, rocket-propelled shells (like those used in Multiple Launch Rocket Systems or air-to-ground rockets) fall under the broader umbrella of rocket artillery (*реактивная артиллерия*).

2. **Aviation (*Авиационный*):** Indicates that the artillery rocket system has been adapted or specifically designed to be loaded onto and fired from aircraft (fixed-wing jets or rotary-wing helicopters).

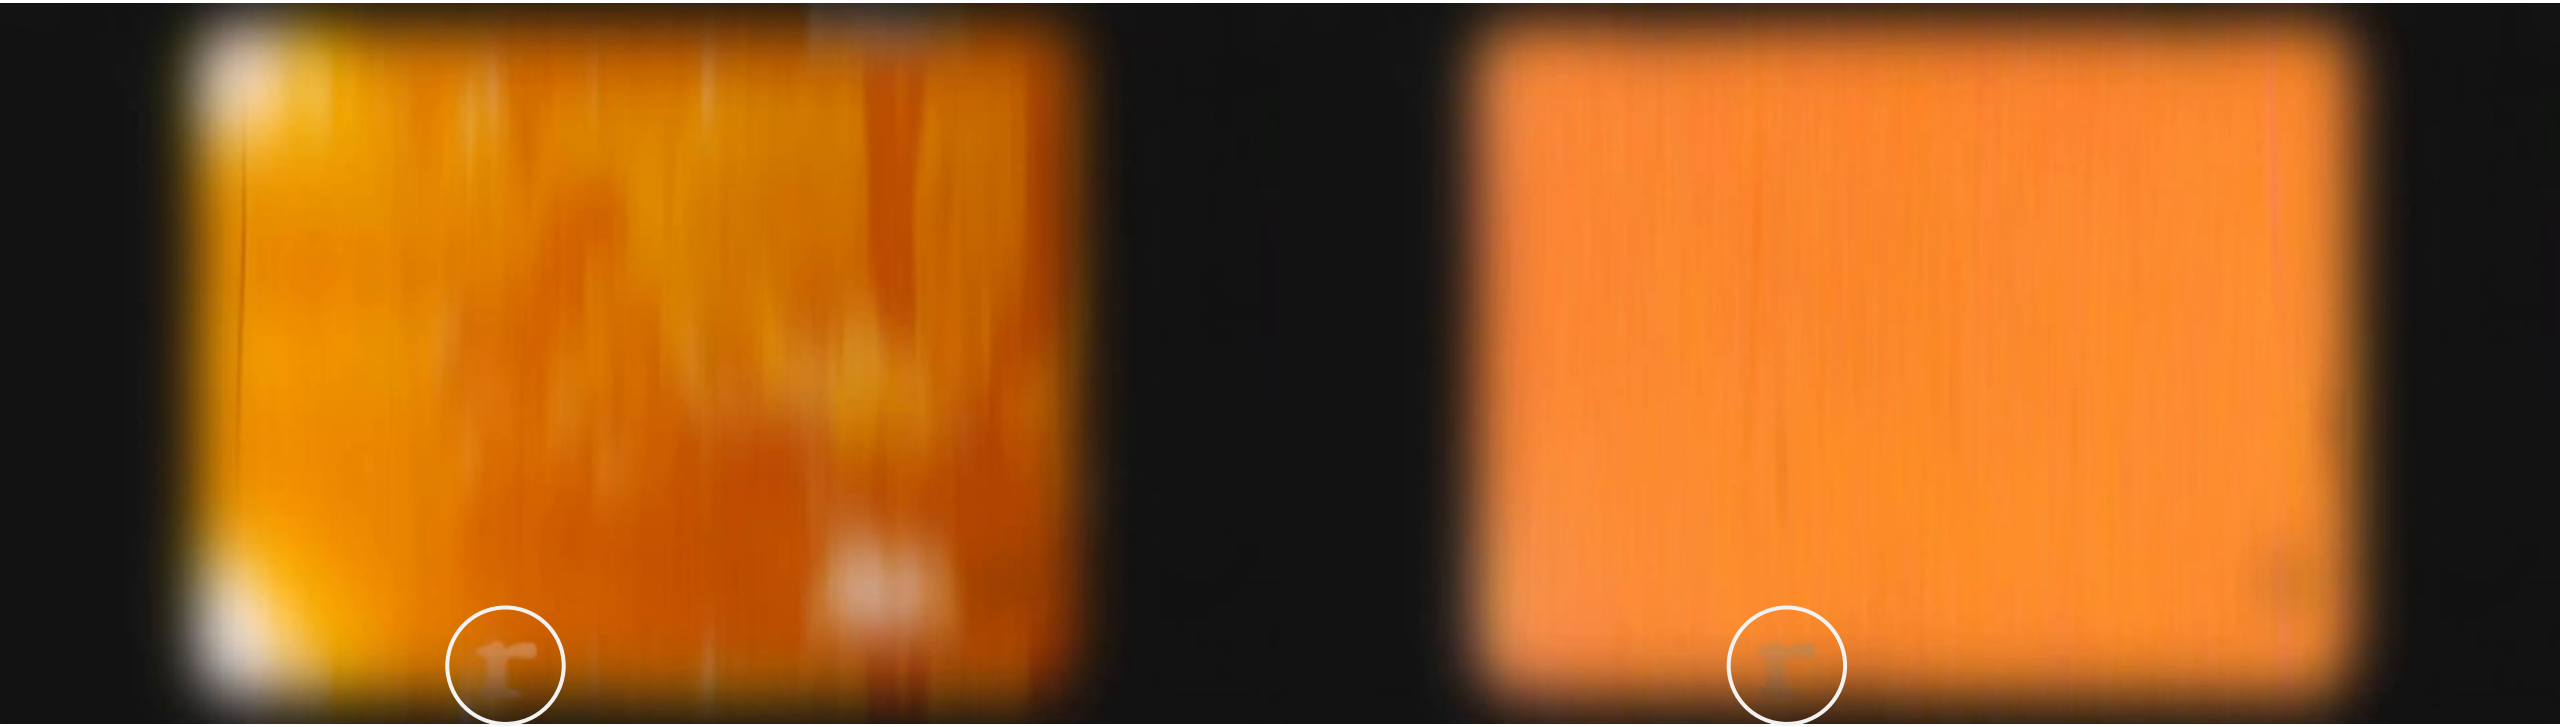

3. **Practical Use:** These are essentially **air-launched rockets** (often unguided) designed to deliver high-explosive, armor-piercing, or fragmenting warheads to ground targets or enemy positions.

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

01 - Tape 02 - Case 11 - Tin bird unauth

Start frame: 1049
End frame: 1260
Total frames: 212
Timer start: 00:33:30
Timer stop: 00:33:34

"Tin bird" is the same codename that is used in ivan0135 first video (sequence Tape 01 - Case 07 - "Tin bird") to describe the visible craft in the footage. We can note that it's note on the same tape (Tape 02 vs Tape 01).

"Tin bird unauth" - qtecqot01_1207.png

"Tin bird" - ivan013501_0200.png

"unauth" in the title of the sequence could stand for "unauthorized". Is there a link with the previous Russian message ("*Previous message warned about AARS*")?

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

01 - Tape 02 - Case 11 - Tin bird unauth

Start frame: 1049
End frame: 1260
Total frames: 212
Timer start: 00:33:30
Timer stop: 00:33:34

We can notice that the word "Tin" is used in sequence "Tin bird primer" (Tape 02 - Case 11) in 2026-06-15 qtecqot second footage. The craft as the same "tin" appearance, could it be the same craft?

"Tin bird unauth" - qtecqot01_1207.png

"Tin bird primer" - qtecqot02_0472.png

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

01 - Tape 02 - Case 11 - Tin bird unauth

Start frame: 1049
End frame: 1260
Total frames: 212
Timer start: 00:33:30
Timer stop: 00:33:34

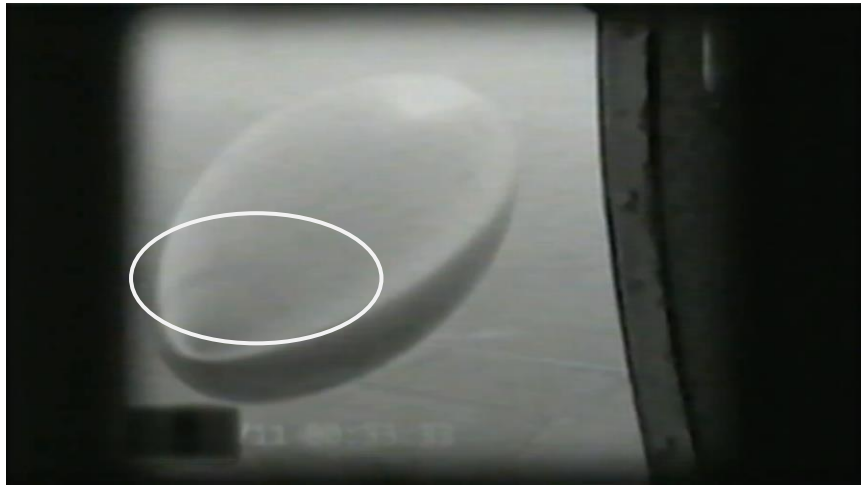

For the "Tin" craft type, we can barely see on the "Tin bird unauth" an engraving on nose of the craft, that we can better see on "Tin bird primer" sequence (from 2026-06-15 qtecqot release) and find again in the "Tim's show &tell".

The consistency here is absolutely remarkable.

The probability that we see in fact in these sequences the same craft is high.

"Tin bird" - ivan013501_0200.png

"Tin bird unauth" - qtecqot01_1210.png

"Tin bird primer" - qtecqot02_0472.png

"Tim's show &tell" - qtecqot01_2525.png

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

01 - Tape 02 - Case 11 - Tin bird unauth

Start frame: 1049
End frame: 1260
Total frames: 212
Timer start: 00:33:30
Timer stop: 00:33:34

From frames 1207 to 1210 (4 frames), it seems that there is a kind of "glitch"; the craft "jump" after the glitch. The craft is not at the same place, in less than a second (1 frame = 0.03 s).

Could it be because of the devices and method used for digital transfer (recording) of the argentic film? Like film changeover, failure of a device, etc.

Film changeover could be plausible and show that the visible timer is not necessarily synced with image (confirm edition and/or latter addition).

Just after this glitch, we can see part of a human nose, at the top right of the frame 1210.

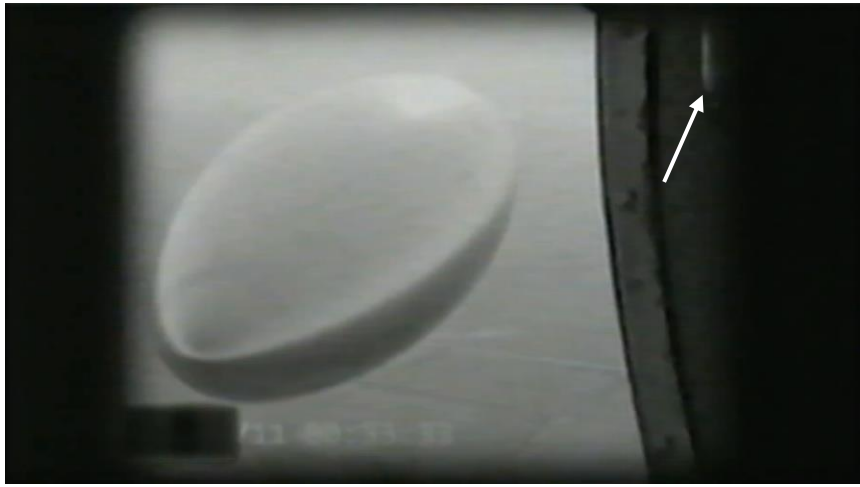

"Tin bird unauth" - qtecqot01_1207.png

"Tin bird unauth" - qtecqot01_1208.png

"Tin bird unauth" - qtecqot01_1209.png

Human nose - qtecqot01_1210.png

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

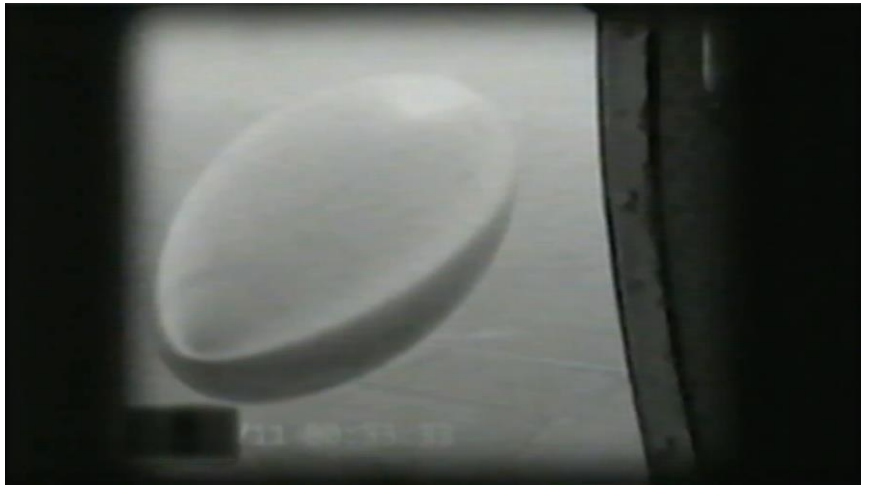

01 - Tape 02 - Case 11 - Tin bird unauth

Start frame: 1049
End frame: 1260
Total frames: 212
Timer start: 00:33:30
Timer stop: 00:33:34

From frames 1210 to 1247 (36 frames), we can clearly see a human face (probably military) moving for observing the craft.

At frame 1225, a strip of adhesive tape is added on the projection (it's slightly out of focus) to mask the eyes of the face, which is moving toward the window to see the craft.

We can note that the maintain of anonymity is important here.

Nose apparent upper right - qtecqot01_1210.png

Strip of adhesive tape - qtecqot01_1225.png

Human face - qtecqot01_1240.png

Human face - qtecqot01_1210.png

Start frame: 1049
End frame: 1260
Total frames: 212
Timer start: 00:33:30
Timer stop: 00:33:34

At the end of this sequence with the human (military) face, we can see on frame 1248 that the footage is masked by some yellow material (slightly transparent) which seems to come "physically" above the footage.

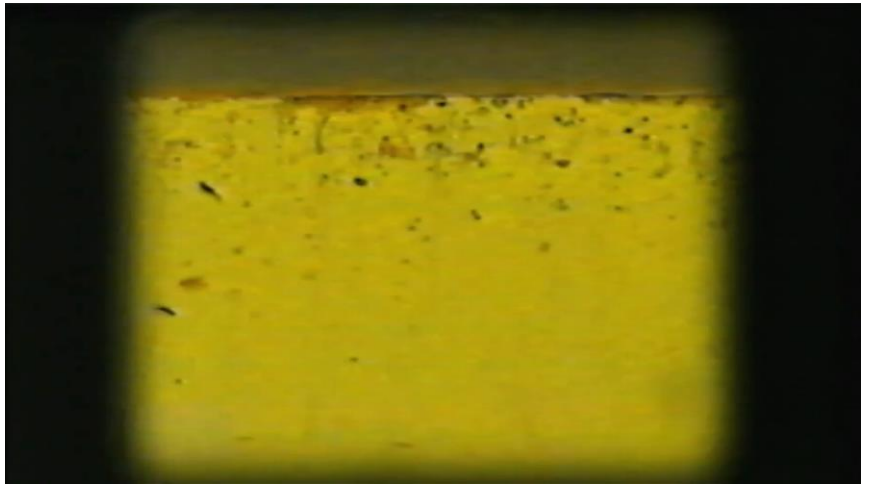

Could it be related to original footage diffusion system or acquisition system specificities and/or constraints (end of tape, splice,etc.), presumably digital recording of argentic film?

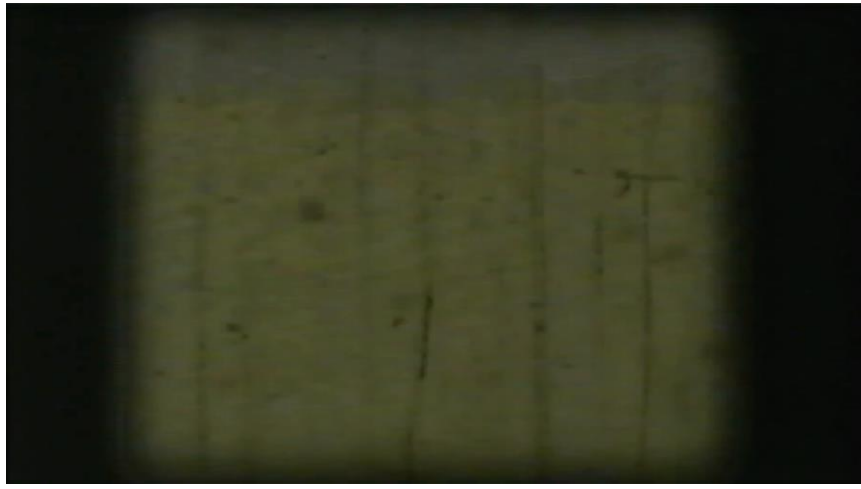

Human face - qtecqot01_1247.png

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

02 - Tape 02 - Case 12 - Mk.4 taxi

Start frame: 1261
End frame: 1303
Total frames: 43
Timer start: 01:08:21
Timer stop: 01:08:22

First mention and sequence of "Mk.4" craft (probably "Mark4", see "Mk.5 virgin (col/s)" sequence). There is two other sequences with Mk.4: "Mk.4 pace lap" and "Mk.4 early boarding" (walk inside a Mk.4 craft!) in 2026-07-24 qtecqot third footage. All sequence wich "Mk.4" are from from Tape 02 (there is no Tape 02 extract in ivan0135 footage). The quality of this sequence is different of the previous and next sequence, more like Tape04 type.

"Mk.4 taxi" - qtecqot01_1276.png

"Mk.4 pace lap" - qtecqot01_1304.png

"Mk.4 taxi" is a very short sequence (43 frames at 29.97 fps).
It seems to have an "exhaust" under the craft during the take-off (could be artifact). As a taxi, is it boarding people?

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

03 - Tape 02 - Case 12 - Mk.4 pace lap

Start frame: 1304
End frame: 2501
Total frames: 1198
Timer start: 01:10:55
Timer stop: 01:11:21

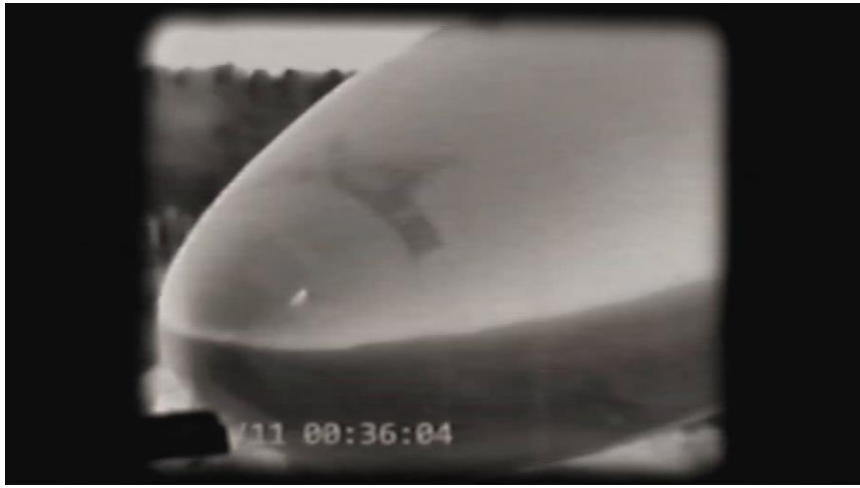

In this second clip that mention craft "Mk.4", we can see a lot of similarity with "Tin bird" type craft: Overall form, metallic appearance.

Is it the same or a different type of craft?

Maybe same family and different iteration?

Tin bird - qtecqot01_1094.png

Tin bird - qtecqot02_0574.png

Mk.4 - qtecqot01_1264.png

Mk.4 - qtecqot01_1367.png

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

03 - Tape 02 - Case 12 - Mk.4 pace lap

Start frame: 1304
End frame: 2501
Total frames: 1198
Timer start: 01:10:55
Timer stop: 01:11:21

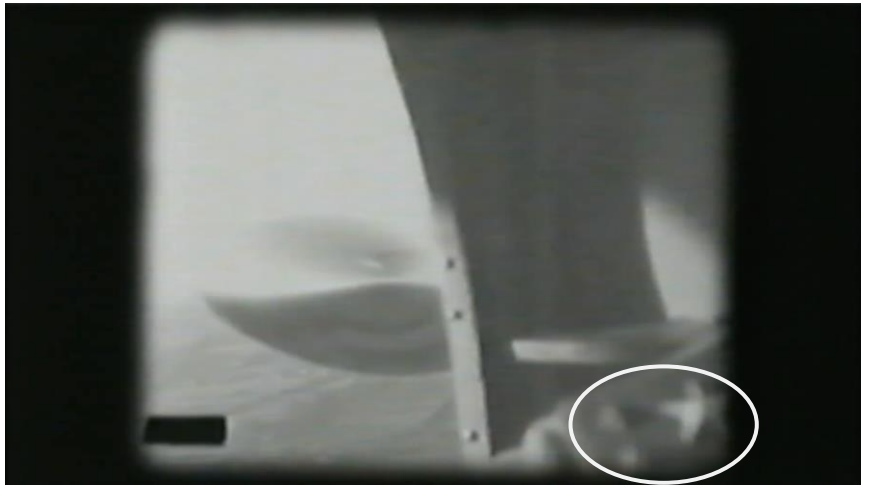

From the frame (about) 1435 to 1670, we can clearly see a human face, who is a military because of the visible insignia on shoulder boards.

We can distinguish tree groups:

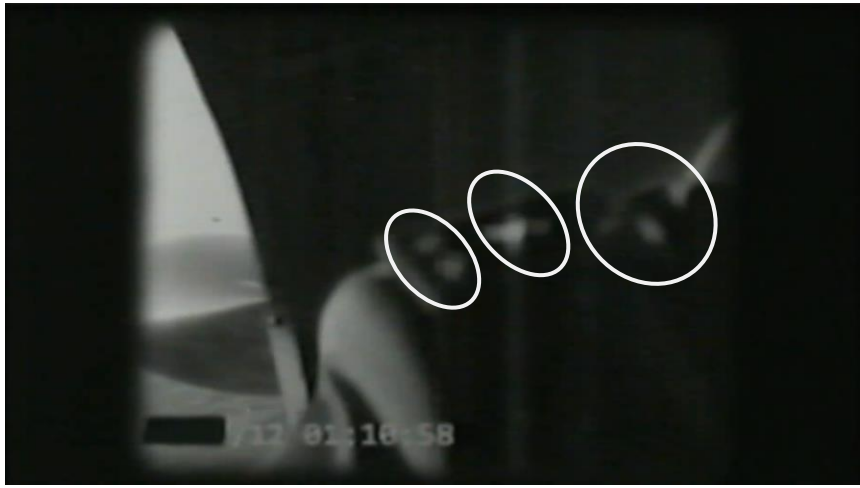

- Two object, maybe little star/pin for fixation
- One big five-pointed star (metallic appearance)
- One badge/pin, barely visible

We can see a kepi, too. It is important to note that the identity of this military doesn't need to be preserved, contrary to the previous one.

We can note that big metallic star insignia are common in Russian army between 1943 and 1990.

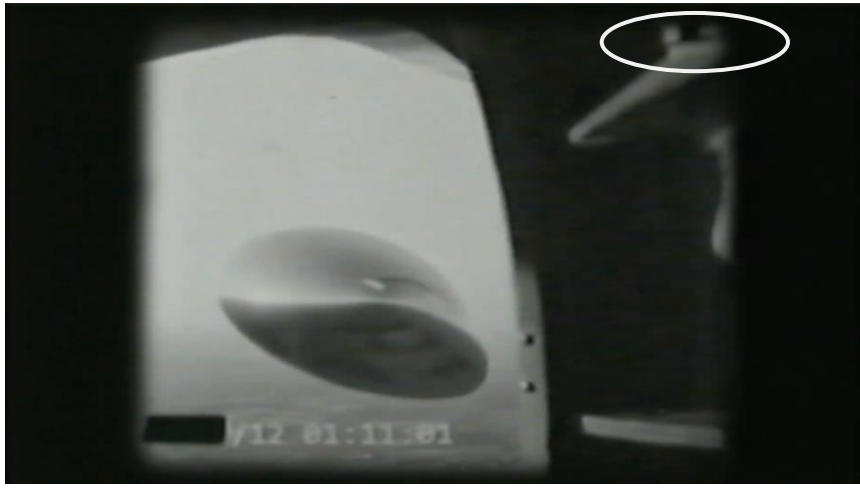

Insignia - qtecqot01_1435.png

Insignia - qtecqot01_1488.png

Insignia - qtecqot01_1533.png

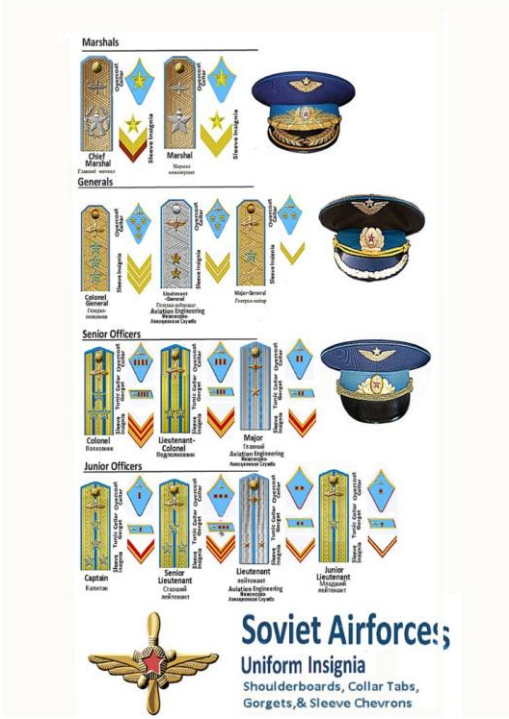

Kepi - qtecqot01_1620.png

03 - Tape 02 - Case 12 - Mk.4 pace lap

Start frame: 1304
End frame: 2501
Total frames: 1198
Timer start: 01:10:55
Timer stop: 01:11:21

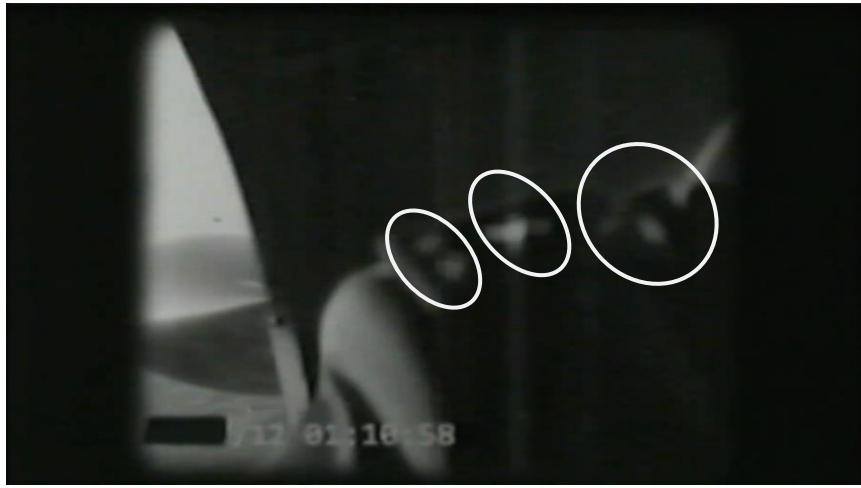

Here is some example for old Soviet Army shoulder boards, which could match. Of course, it could be another country.

Insignia - qtecqot01_1435.png

Insignia - qtecqot01_1488.png

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

04 - Tape 05 - Case 26 - Tim's show &tell

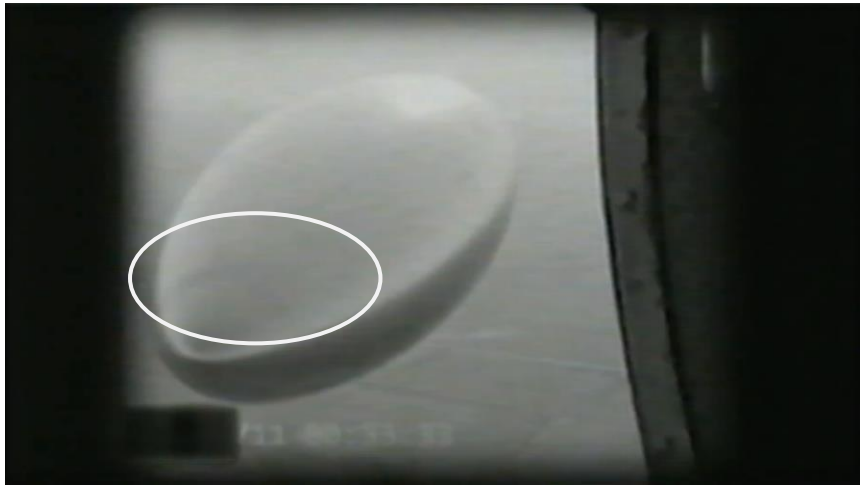

Start frame: 2502
End frame: 2570
Total frames: 69
Timer start: 01:01:18
Timer stop: 01:01:19

In this short sequence, we can see "slim Tim" (see 2026-06-15 qtecqot release) showing something on the engraving on what seems to be "Tin bird" type craft.

We can clearly see the reflect of Tim in the craft, but we can distinguish a reflect of another person, too.

Two reflections - qtecqot01_2560.png

"Tin bird unauth" - qtecqot01_1210.png

"Tin bird primer" - qtecqot02_0472.png

"Tim's show &tell" - qtecqot01_2525.png

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

05 - Tape 06 - Case 31 - Mk.5 virgin (col/s)

Start frame: 2571
End frame: 2990
Total frames: 420
Timer start: 00:57:56
Timer stop: 00:58:04

There is a lot of information to unpack in the sequence "Mk.5 virgin (col/s)". First, regarding the technical aspect, this sequence is captured in color, like "Family vacation" clip from ivan0135 release. We can note that they came from the same tape (Tape 06).

"Mk.5 virgin (col/s)" - qtecqot01_2682.png

"Family vacation" - ivan013504_1859.png

Second, for the first time there is audible sound recording in this clip (mixed with the sound of the projector) with human voices, unfortunately it is very complicated to identify what it is said. Least, could the clip name indicate state of Virginia, U.S.?

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

05 - Tape 06 - Case 31 - Mk.5 virgin (col/s)

Start frame: 2571
End frame: 2990
Total frames: 420
Timer start: 00:57:56
Timer stop: 00:58:04

Visible information - qtecqot01_2682.png

It's interesting to see that there is no mask on information near the timer as usual, we can read "T6-02/31".

For all previous clip (ivan0135 and qtecqot), only the case number was visible to the left of the timer. This is the first and unique that doesn't mask it. We know that this clip com from Tape 06.

So, presumably "T6" is for "Tape 06", however the "-02" role remains unidentified. The fact that there is the case number ("/Case 31") just after comforting the hypothesis that "T6" stands for "Tape 06".

What is the point for masking this information on other clip, if they display the same type content (i.e. tape number + another number)? The tape number is given in all footage description.

Why it isn't critical to mask this one, specifically? Could it be an error?

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

05 - Tape 06 - Case 31 - Mk.5 virgin (col/s)

Start frame: 2571
End frame: 2990
Total frames: 420
Timer start: 00:57:56
Timer stop: 00:58:04

Mk.5 message - qtecqot01_2640.png

A message in Russian is displayed above the footage, from frame 2603 to frame 2660.

AI - Google Gemini 3.1 Pro/3.6 analysis

Transcription (Russian):
Самолет Mark 5 (1961 год)

Translation:
Mark 5 airplane (1961)

So, we understand that "Mk.5" stands for "Mark 5" and it's used as an identifier for the aircraft.
We can infer from the preceding sequence that "Mk.4" refers to the Mark 4 craft.

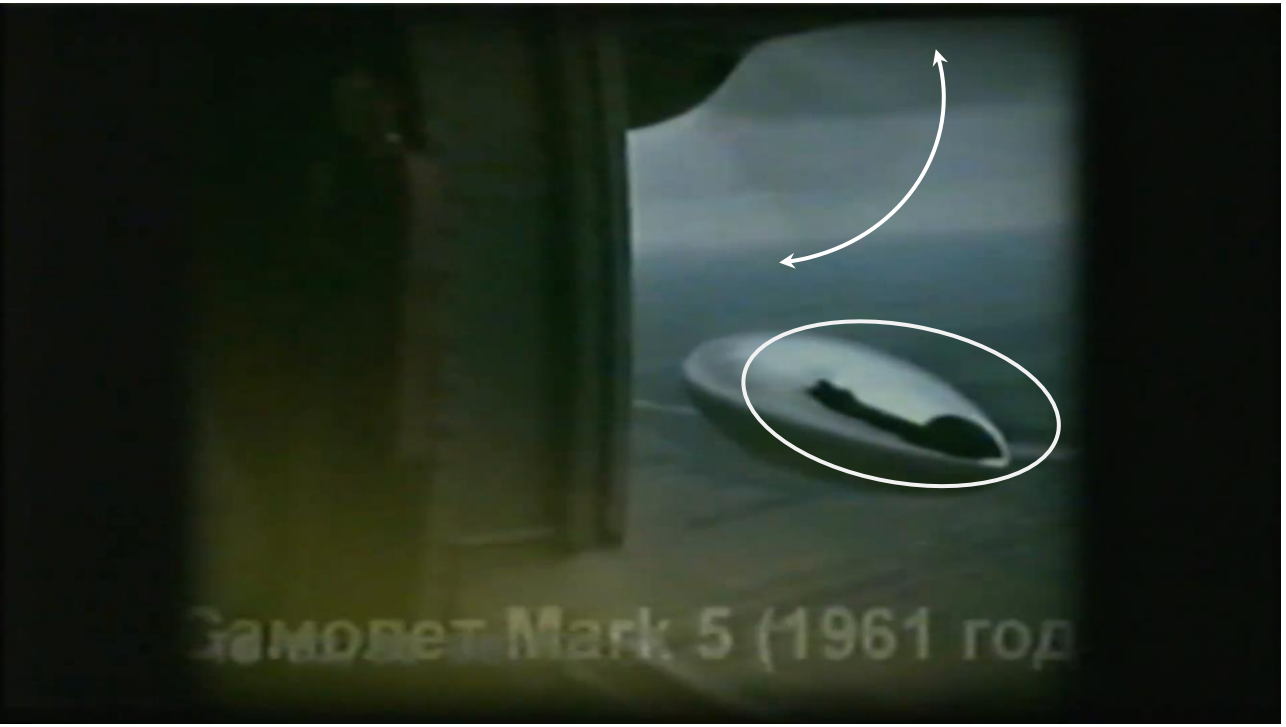

Is this nomenclature used to designate the type of vessel (but this one is very similar to "Tin bird" type or "Mk.4") or their number (which would imply, in that case, that there are at least five of them, like five "Tin bird" type craft)?

There is an information about the year (Year 1961), could be the year of capture. What is interesting here is that there is a mix between English (Mark 5) and Russian (Самолет). It could be important because we will see that this clip have been shooted from a Chinook, a american helicopter.

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

05 - Tape 06 - Case 31 - Mk.5 virgin (col/s)

Start frame: 2571
End frame: 2990
Total frames: 420
Timer start: 00:57:56
Timer stop: 00:58:04

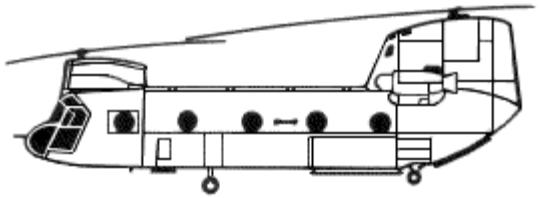

Chinook and rotor - qtecqot01_2636.png

We can see the reflection in the craft of what seems to be a Chinook, a military US helicopter with a very characteristic appearance.

Through the frame of this clip, we can distiguinsh the Chinook moving and his 2 big rotors in movement reflected in the craft, there is very little to no doubt that the scene is shooted from a Chinook.

This is corroborated by one of the rotor directly visible in the upper middle of the frames and the audio that seems captured from a helicopter.

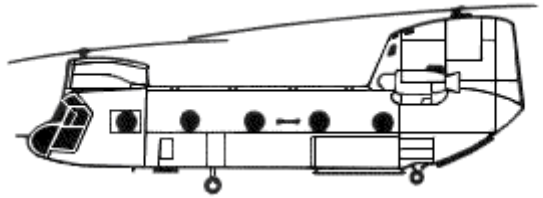

Confidential leaked ufo-ebe footage continuation of disclosure (2026-05-25)

05 - Tape 06 - Case 31 - Mk.5 virgin (col/s)

Start frame: 2571
End frame: 2990
Total frames: 420
Timer start: 00:57:56
Timer stop: 00:58:04

Chinook matching reflection - qtecqot01_2636.png

The Chinook was build by Boeing. The prototype Boeing Vertol YCH-1B first flight was on September 21, 1961. The model Boeing CH-47F Chinook as we know today was released in 1962.

It could be completely plausible that it was used in late 1961 for special operation.

But all the release of ivan0135 and qtecqot are heavily stamped by Sovietic environment (KGB, Russian message), here we are full in US environment (could be nice to identify the language in the audio of this clip) with operational US military asset in action.

If we can identify the nationality of the military we see in "Mk.4 pace lap" (probably Soviet or American), it could be a great information to know part of the story of this footage archive.

There is 3 hypothesis:

1. Sovietic stole US NHI-related material, that could explain the Russian annotation above footage. in this case, the military seen in "Mk.4 pace lap" should be American.
2. There was a collaboration between USA and Russia on this matter
3. Some edit are voluntary deceitful (AI usage) to muddy the water about the origin of this material
